

Open Investigation Review (OIR) is done *Ideally*

Engineer requests release notes

Writer assigned release notes story in ADO

Writer completes release notes

Send for review

Vehicle owner prompted to install update to view OTA release notes

Can the place in the process for this be mandated?

OIR Presentation "Effect of Condition" *Alternatively this information could be included by the requester*

Essential Info:

- How many impactful changes were made?
- List which changes are fixes and which are enhancements. (A fix would indicate a function was broken, whereas an enhancement would improve the existing function)
- What systems are affected by the change? (For example, HVAC, Audio, Steering)
- Where will the change(s) be noticed by the driver?

The template the requester fills out could be based off of these questions to distill it down to essential information

Can the below be *required* for the writing team to accept a release notes request?

1. Essential info in box above
2. A standard time frame

Draft release notes here:
<https://generalmotors.sharepoint.com/sites/ssdesign/Shared%20Documents/Forms/AllItems.aspx?ct=1733255032586&or=Teams%2DHL&ga=1&LOF=1&id=%2Fsites%2Fssdesign%2FShared%20Documents%2FGeneral%2Fservices%20Practice%2FSupport%20%20%28move%20contents%20to%20...>

- Writer clicks link in ADO story and completes fields in form: Vehicle Update Name, Vehicle Release Notes, Yes to Ready for Legal Approval, Save.
- Change ADO State to Team Reviewed or Ready to Implement. Change to Closed end of sprint.

Example can be found here:
<https://www.figma.com/design/coMnQFrcf2LwKaG8eh1BfQ/Style-Guide?node-id=5-15&no...>

Existing Preferred Verbiage:

- Improves
- Reduces
- Adds
- Fixes

Additional Options:

- Enhances
- Applies
- Addresses

Key Partners:
Systems Engineer:

- Originates request in ADO
- Sees campaign (OTA Update) through execution

Investigation Engineer:

- Source for additional information on updates
 - Provides OIR deck
- Reviews initial SUFS and investigates cause/effect/impact
